Enlarged Magazine Release Button

Having an enlarged magazine release button has become one important elements of modern rifles. In addition to building a more modern look, it has the practicality to allow shooters rapid magazine reloading.

EBB System

The ICS EBB (Electric Blow Back) system adds a realistic feeling, incorporating features of a real firearm without reducing durability and shooting accuracy.

Battery Stock Tube

CXP-YAK utilizes the ICS stock tube that also functions as a battery compartment. Its design incorporates the cable hidden into the lower section of the tube. This facilitates the storage and change of batteries. In addition, the battery can be accessed by simply removing the stock. The concealed cable design keeps the cables protected from damage and facilitates handling.

CXP-YAK SERIES

MTR-S1 Stock

The MTR-S1 Stock offers much more space for battery storage. It is made of a single molded piece of high strength industrial polymer. Its TPR butt pad offers greater comfort, non-slip design and a durable material. In addition, this pad is easy to remove without the need for tools.

UKSR Stock

The UKSR Precision Adjustable Stock provides fine tuning on the cheek piece height and the butt pad length, offering 12 precision adjustment levels for the custom needs of snipers. Additionally, UKSR offers a large internal compartment that allows batteries of larger capacity to be easily installed.

CFS Folding Sights

The CFS low-profile folding tactical sights offer maximum functionality and durability with minimal space usage. Installing optical equipment and backup sights at the same time will no longer be a problem. The CFS sights are entirely constructed of high-strength nylon fiber reinforced polymer, offer easy tool-less elevation and windage adjustment, and the spring-loaded sight post provides immediate deployment and collapse with a solid feel. And of course, it is compatible with all types of Milspec 1913 Pictatinny mounting rail systems.

CXP-YAK

SERIES

Integrated MOSFET

ICS incorporates an FET to avoid high temperatures in the switch assembly. This increases the durability of the assembly itself and the overall system.

Durable Internals

Factory installed upgrades such as high strength engineering plastic piston, metal H-UP unit, reinforced MIM pinion, and MIM bevel gears. These features allow the rifle to be operated smoothly and reliably for longer time.

T-Mag

The innovative 300-round high capacity magazine with ammunition viewing window provides players with the maximum control on their firepower.

ICS Split Gearbox

Consistently with superior ICS design, the tried-and-true technology of the split gearbox is easily disassembled and convenient for maintain and repair.

Quick Change Spring Upper Gearbox

The upper gearbox features a quick spring guide detach design that makes spring change much easier. You'll simply need to insert an Allen key into the back of the spring guide, push it in and turn it to pull the spring out of the gearbox. There is no need to disassemble the gearbox, allowing you to change the spring on the run.

Enlarged Trigger Guard

The enlarged trigger guard is a friendly feature for players wearing gloves.
