**M1 Garand** WORLD WAR II  
*Limited*

## M1 Garand 70<sup>th</sup> Anniversary WWII Limited Edition 8mm Rifle

The M1 Garand rifle played a very important role in WWII, the Korean War and also the Vietnam War. General George S. Patton once said that the M1 Garand was "The greatest battle implement ever devised."

In remembrance of the 70<sup>th</sup> anniversary of the end of WWII, ICS has launched a special limited edition M1 Garand rifle. This version has a unique golden receiver, a classic symbol of elegance combined with a real leather sling.

The M1 Garand limited includes a special wooden gun case with a trophy mount designed by ICS, it also features a timeless "70<sup>th</sup> Anniversary of The End of WWII" logo, allowing you to collect and display your limited edition ICS M1 Garand 8mm rifle with pride. The ICS M1 Garand 8mm limited edition version uses 8mm BBs. Compared to 6mm BBs, the heavier 8mm BBs allow the trajectory to be more stable and accurate. This rifle is not only for collecting, but also a combat ready rifle suitable for any battlefield situation.

There will only be 500 ICS M1 Garand limited versions available worldwide. Don't miss your chance to acquire this great collectable!

1. In remembrance of the 70<sup>th</sup> anniversary of the end of WWII, ICS has launched a special limited edition version. The included wooden gun case and trophy mount allow you to collect and display your limited edition M1 Garand.

2. Classic real leather sling.

Sling ( length ) : 965mm = 38" ( long )  
Sling ( length ) : 670mm = 27" ( short )  
Sling ( width ) : 32mm = 1  $\frac{1}{4}$  "  
Hook : Stamping  
Material : Steel / Calf Leather

3. Every M1 Garand stock is made from a single piece of real wood with unique wood grain.

- Both front and rear sights feature realistic windage and elevation adjustment.  
A unique serial number is engraved on the receiver.

ICS

6 . Realistic trigger safety assembly, functions exactly like the real gun.

7. One piece cylinder head and additional O-ring inside the air nozzle to increase air compression.

9. High end ICS Turbo 3000 motor suitable for high torque gears and high FPS springs. Our top of the line ICS motor.

10. The gearbox is designed to use 8mm bushings which makes the gears more stable and reliable.

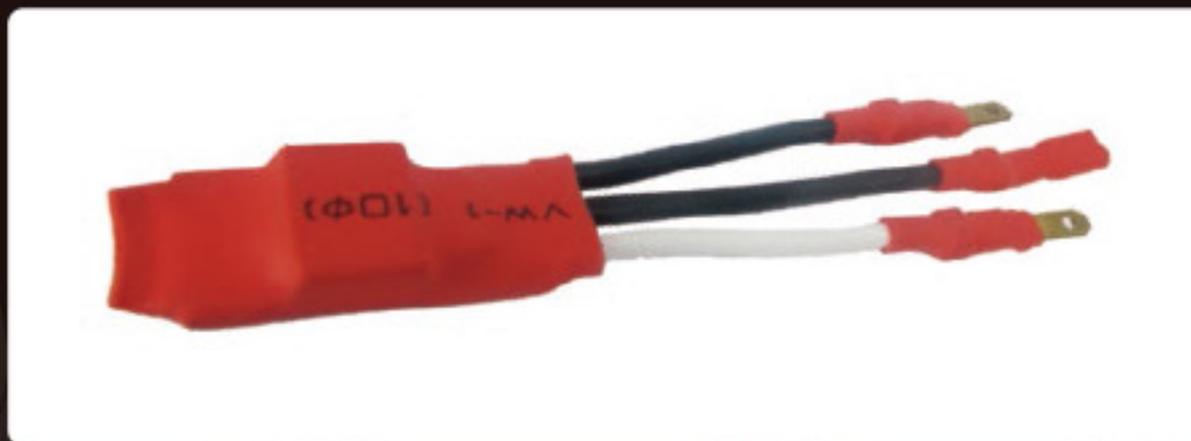

11. New Steel Gears: Assembled with an upgraded steel MIM gear set.

12. Nylon Fiber Piston: The cylinder head features 8 ventilation holes which enhance air flow speed allowing the piston to operate smoothly and efficiently.

13. ICS uses FET to eliminate high switch assembly temperatures. This increases durability of the assembly and accessories.

14. Low Resistance Switch Assembly and Mini Fuse: ICS assures our AEGs perform at low electric resistance, spark free, for an extended service life.
