■ The trigger can be pulled when holding the grip safety firmly.

holding the grip safety.

The trigger cannot be pulled without

3 LOADING MAGAZINE

■ Load the magazine until it clicks into the locking

Do not insert the magazine by force.

hammer is cocked, or damage might be caused.

■ Release the magazine by pressing the magazine

pistol grip to prevent it from dropping.

Please use a 2mm Allen wrench to adjust the trigger pull hex screw.

Please adjust according to personal habit.

hex screw to the end, please release the screw

 For safety reason, please remove the magazine while not operating.

VARNING · ATTENTION

To prevent misfiring, keep

your finger off the trigger

and out of the trigger

3. Insert the cartridge into the magazine. *Waring! Do not throw it into the magazine to avoid the danger.

4 CO2 CARTRIDGE INSTALLATION

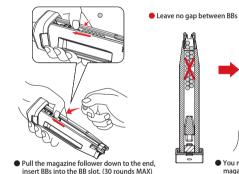

I. Remove the magazine buttpad.

4. Fasten the cartridge fixing screw. * Waring! The magazine has a decompression hole, do not aim at the eyes when you rotate the fixing screw. 5. Install the magazine buttpad then ready to use.

RNING · ATTENTION

o avoid the overheating of the cartridges, the cartridges should be stored in cool, dry place and away from the heat source, which must below 31°C, in case the inflation of volume and generate high-pressure gas due to temperature uprising of the content liquid CO2, which will deal greater pressure to the cartridges, and lead to the risk of explosion

5 LOADING BBs

You may insert the last BB through the magazine lip.

※ Do not attempt to insert more than 30 BBs

into the magazine.

2. Pull the slide to the end and hold (the hammer

ARNING · ATTENTION Do not release the magazine follower

WARNING

abruptly while pressin the follower. Releasing the follower carelessly may damage the magazine lip.

is aiming while proceeding non-firing operations.

8 SHOOTING

To prevent misfiring, keep your

finger off the trigger and out of

the trigger guard when you are

- 1. Switch the safety to FIRE.
- Load the pistol according to step 7.
- 3. Pull the trigger to fire (a BB pellet will be fired and the slide will be pushed backward).

The slide will be blown back

and forth when firing.

not ready to fire. When the BB is loaded into the barrel, the following process will be proceeded and repeat automatically everytime you

pull the trigger: BB fired → Slide movement (blowed backward) → Load the

- The rails on the slide is very sharp. Please keep your face and fingers away from the slide while the slide is
- Please keep your finger off the trigger and out of the trigger guard, and take extra caution to where the gun

ARNING · ATTENTION

Please do not operate the pistol up

Power Depression

9 STORAGE

- 1) Press the magazine catch button to release the magazine.
- (2) Make sure the inner barrel is clear. If not, pull the slide backward. and turn the pistol up side down to remove (push the BB pellet

- 3 Press the slide catch lever to release the slide.
- (4) Pull the trigger and fire several times towards safety directions. and make sure no BBs are left inside the barrel.

1. Insert the magazine.

7 Loading

The trigger could be locked by fastening the

6 Trigger Pull Adjustment

the moment) 4. Press the slide catch downward, the slide will be pushed forward (a BB pellet will be loaded into

will be pressed down). Keep your face and fingers awa 3. Release the slide (the slide is held at the back at

- from the slide while the slide is operating.

 When the magazine is detached the slide stop will not lock the slide spontaneously after your
- releasing the slide. When the pistol is loaded, the BBs load into the barrel repeatedly, which will lead to malfunction while firing and

ARNING · ATTENTION

- cause danger.

 When the hammer is pressed down, pulling the trigger wil fire the bb. Please take extra

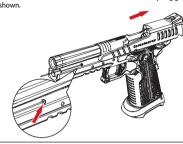

Only disassemble your airsoft replica when adjusting the H-UP and proceeding to maintenance.

- 1) Press the Magazine Release Button to unload the magazine. 2 Remove the compensator screws, and detach the compensator.
- 3 Pull back the slide and press the slide stop upward to lock it. (4) Insert the dedicated tool into the hole on the recoil spring guide as

⑤ Push the Slide backward and align the notch corresponds to the slide stop as shown.

- 6 Press the slide stop button on the right to remove it.
- necessity Push the slide forward to detach it. Meanwhile, The recoil spring
- The recoil spring guide set can be easily removed by slightly pushing it forward and taking it out.
- 9 Push the outer barrel set forward to remove. You may disassemble the recoil spring guide by detaching the dedicated tool if necessary.

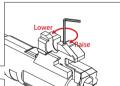

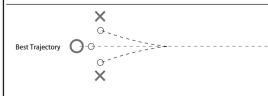

- out of the trigger guard, and also mind where the gun is aiming while proceeding
- Watch out for the rod may bounce out of off the recoil spring guide set.

11 H-UP ADJUSTMENT

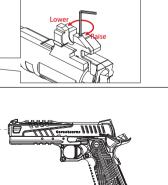

① Please disassemble and remove the slide as step 10 instructed.

H-up Adjustment: Make sure the trajectory of the BB pellets to be straight. Rotate the screw clockwise to raise the trajectory. Rotate the screw counterclockwise to lower the trajectory.

12 ASSEMBLY

- Please check the following status before assembly: The hammer must be down pressed.
-) Insert the dedicated tool into the hole on the rod and reverse Step 10. to assemble the recoil
- spring guide set. 2) Assemble the outer barrel set by pushing it back into the slide.
- 3 Assemble the recoil spring guide set to the

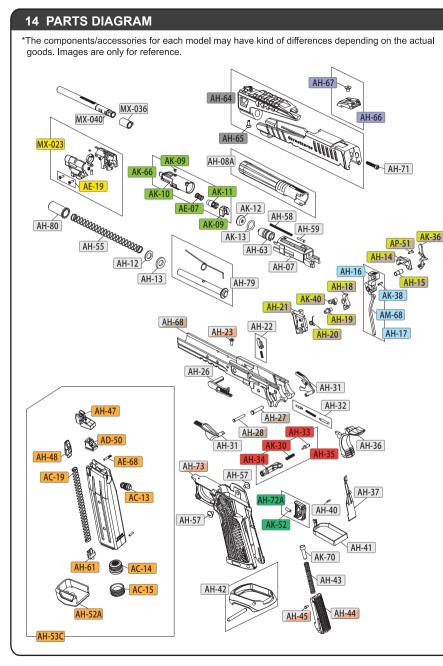

receiver from the front and insert the slide stop when the notch is aligned to slide stop's corresponding positon. The recoil spring guide set is still contained Remove the dedicated tool

(4) Assemble the slide to the

- after you lock back the slide, then press down the slide stop to release. 6 Insert the compensator onto the rail, and lock the screws on.
- VARNING · ATTENTION ICS will not be responsible
- for any part assembling errors, missing parts, and issues such as malfunctions accidents, injuries. all the maintaining expenses will be borne by the customers.

13 BASIC TROUBLESHOOTING GUIDE POSSIBLE CAUSE SYMPTOMS SOLUTIONS Switch the safety to "OFF". (refer to step 2) The safety is ON. (No firing) No response Replace a new cartridge after confirming the cartridge is Insufficient gas in the cartridge empty (refer to step 7, item 4 and step 4) Temperature is too low. Reheat the cartridge to room temperature. (during the winter) CO2 comes out from the barrel It will return normal after firing several times.
