Smart Trigger

The smart trigger is able to distinguish whether it is time for Burst Mode (light touch) or Full-auto Mode (long, deep press) allows any airsofter plays more instinct and fast. As the new generation of the system has arrived, be ready to be the lightning on the field.

Short Stroke Trigger

Shorter distance trigger travels, faster firing rate you can get. With pre-cocking mechanism, all your moves are able to go like a straight line.

ICS Unique Split Gearbox Design

Simulating action of real firearms is crucial part of gaming experience. The unique ICS-designed Split Gearbox provides simulating action like disassembly of real firearms but also accessibility to quick disassembly for work like maintenance and upgrading.

Gearbox QD Spring Guide Design

The split gearbox and quick-change spring design allow for rapid spring replacement, making it more flexible to adjust for various environments.

Spring Release Function

The built-in ICS Spring Release mechanism actively protects the spring, piston and your airsoft investment. Whenever the SAFE mode is selected, the spring is automatically released reducing wear off of the spring, and other internals.
