# New Generation Invincible Steel Gear

## MC-218 NO.1 GEAR / MC-219 MOTOR GEAR

### 01 INTRO

ICS No.1 gear and motor gear are all produced via MIM (Metal Injection Molding) process, broke through the limitation of traditional process, and re-design the angle and caliber of gear to maximize functionality and reduce revolving noise. They are the perfect gearbox upgrade choices.

NO.1 GEAR MC-218

MOTOR GEAR MC-219

# New Generation Invincible Steel Gear

MC-218 NO.1 GEAR / MC-219 MOTOR GEAR

## 02 FEATURES

- 1.▶ Made by high strength and durable material, the new gear has more than **twice performance improvement** compare to the traditional process.
- 2.▶ MIM process could reach **99% density** to achieve high precision, increase engagement and **reduce noise of gear**.
- 3.▶ No.1 gear and motor gear are both **intergral forming to achieve stability and well-shaped**.
- 4.▶ The new design of No.1 gear and motor gear are **compatible with MARUI system**.
